- High sensitivity for quality and perfection.
- Organized personality with self-confident appearance.
- Confident in English and German.
- Responsible, outgoing, team player, thinking out of the box.
- Basic knowledge of PCs

## ABOUT US

---

SILBERSALZ Film GmbH is an established full-service film production & agency in Stuttgart.

Because we love film, we were the first in Europe to decide, in the course of the analogue renaissance, to rebuild a cinefilm lab at an additional location and, above all, to think in new ways. This motivation also gave rise to the product **SILBERSALZ35**, which is popular with photographers and which we process in our walls with a start-up character. Our customers from the professional moving image and photo sector appreciate our uncompromising quality and our modern working methods.

To strengthen our team at our laboratory location in Stuttgart, we are looking for an for a Head of Film Lab & Digitisation (m/f/d).

Send us an application with your previous experience and your salary expectations to [jobs@silbersalz-film.de](mailto:jobs@silbersalz-film.de)
